## NATIONAL REGISTER OF HISTORIC PLACES (NRHP)

In general, a property that is eligible for the NRHP is at least 50-years old, retains its historic integrity, and meets one of the NRHP's areas of significance. The NRHP Criteria for Evaluation and Significance are described as follows in the National Register of Historic Places Bulletin 16b is reproduced below:

The quality of significance in American history, architecture, archeology, engineering, and culture is present in districts, sites, buildings, structures, and objects that possess integrity of location, design, setting, materials, workmanship, feeling, and association, and:

- A. That are associated with events that have made a significant contribution to the broad patterns of our history; or
- B. That are associated with the lives of significant persons in our past; or
- C. That embody the distinctive characteristics of a type, period, or method of construction, or that represent the work of a master, or that possess high artistic values, or that represent a significant and distinguishable entity whose components may lack individual distinction; or
- D. That have yielded or may be likely to yield information important in history or prehistory.

In addition, each primary architectural resource in the SHPO database has been classified by age, type, style, materials, height, and NRHP eligibility. Properties were evaluated for eligibility using the following criteria guidelines and ratings established by the Utah SHPO for surveys:

- ES – Eligible/Significant:** built within the historic period and retains integrity; excellent example of a style or type; unaltered or only minor alterations or additions; individually eligible for National Register under Criterion "C" (architectural significance); also, buildings of known historical significance.
- EC – Eligible/Contributing:** built within the historic period and retains integrity; good example of a style or type, but not as well-preserved or well-executed as ES buildings; more substantial alterations or additions than ES buildings, though overall integrity is retained; eligible for National Register as part of a potential historic district or primarily for historical, rather than architectural, reasons (which cannot be determined at this point).
- NC – Non-Contributing/Ineligible:** built during the historic period, but has had major alterations or additions; no longer retains integrity.
- OP – Out-of-Period:** constructed outside of the historic period.
- X – Demolished:** demolished.
- U – Undetermined:** incomplete or undetermined address, duplicate record.

*The SHPO changed the designations used in the database from A to ES, B to EC, C to NC, and D to OP to avoid confusion with the A-D criteria for NRHP significance.*

**The Multiple Property Submission (MPS)** is a thematic process for listing individual properties. An explanation of the process from the National Register of Historic Places Bulletin 16b is below:

The **Multiple Property Documentation Form** is a cover document and not a nomination in its own right, but serves as a basis for evaluating the National Register eligibility of related properties. It may be used to nominate and register thematically-related historic properties simultaneously or to establish the registration requirements for properties that may be nominated in the future. The nomination of each building, site, district, structure, or object within a thematic group is made on the National Register Registration Form (NPS 10-900). The name of the thematic group, denoting the historical framework of nominated properties, is the **Multiple Property Listing**. When nominated and listed in the National Register of Historic Places, the Multiple Property Documentation Form, together with individual registration forms, constitute a **Multiple Property Submission**.

Individual properties and districts are nominated based on their association with themes or specific contextual periods established in the MPDF. Examples in Utah include listings based on property types, such as *Carnegie Libraries* or *Post Offices*, or based on geographic associations, such as *Historic Resources of Murray City*. As with a district, resources that may not appear to be individually eligible for the NRHP can often be listed individually under the "umbrella" documentation of an MPS because their significance can be supported within the contextual periods.
