

Site Map(s) *(see permit part 4.2.3)*

{Maps shall include all structural BMPs, and all site components necessary to demonstrate pollution containment. Multiple SWPPP site map sheets may be necessary to clearly show how and when BMPs are to be employed relative to the construction phases}

The SWPPP site maps shall include but not limited to:

- 1. boundaries of project/property*
- 2. boundaries of disturbance (including areas outside of property boundaries)*
- 3. site grades/slopes*
- 4. location of structures/facilities existing and proposed*
- 5. water bodies, wetlands, existing vegetation*
- 6. stormwater inlets and stormwater discharge points*
- 7. areas that will be temporarily or permanently stabilized on the site*
- 8. points of potential offsite water sources*
- 9. BMPs by name and number, and locations for exposures and any construction operations necessary for this site*
 - a. stockpiles for soils and materials*
 - b. construction supplies*
 - c. portable toilets*
 - d. garbage/trash containers*
 - e. egress points/track out pads*
 - f. concrete washout pits or containers*
